Preschool Chicken Coop

Dramatic Play Printables

Instructions Page

These pages can be used over and over if you laminate them. In my previous years with my centers, I have taught my students to use dry-erase markers with a cloth to reuse and rewrite on these pages after laminating them.

For the card pages, it is best to cut the cards out prior to laminating them. If you laminate and then cut them out, the lamination will fall apart.

A trick I do is cut out the pieces/cards. Then, using a clear glue stick, I dabbed one small dot on the cut-out pieces to secure them inside the laminating sheets so they do not fall out of place while running them through the laminator. (Ask me how I know!) Once they are laminated, cut out the cards and pieces.

Have fun setting up your indoor classroom chicken coop and have even more fun playing in it with your children or students! Enjoy!
